

NEOCERAM

Our Single Use Filling Kit

Optimize your performances with the benefits of the volumetric technology in a Single Use kit

- Global approach with a complete and ergonomic solution
- Accurate and repeatable doses, from 0.1 to 8.5 ml
- Compatible with viscous products

A Volumetric Filling Kit

- Composed of a ceramic piston pump:
 - FDA approved materials
 - No leachables
 - Gentle action on filled products
- High flexibility of the kit design:
 - Comes with standard components (connectors, tubing, needle, etc.) based on your URS
 - Assembled, sterilized and ready to be used
- Comes with standard certificates (USP 87, 88, 788)

An Ergonomic Technology

- Quick aseptic mounting of the filling kit, from the packaging to the filling unit
- Specific PEEK gripper used to securely handle and install the filling kit
- Protective design for the pumps and the needles
- No small parts

Comes with our operator-friendly Filling Unit

- Open-access platform, allowing easy creation of new recipes
- Proprietary pinch valves for fluid distribution
- Quick and secured attachments
- VHP resistant design, can be easily integrated into existing fillers
- Equipped with our PLC and user-friendly HMI, or integratable with existing protocols
- Compatible with other volumetric technologies
- Options: Load sensors, CFR21Part11 and batch report available
